

Lazyclick

Add **WhatsApp Login** to your app/website

Free Forever

No OTPs

Fast & Secure

[Login with WhatsApp](#)

Why WhatsApp Login?

Increased conversion

Streamline user verification and turn more leads into customers

Protect your users

Do away with OTPs, prevent account takeovers with WhatsApp

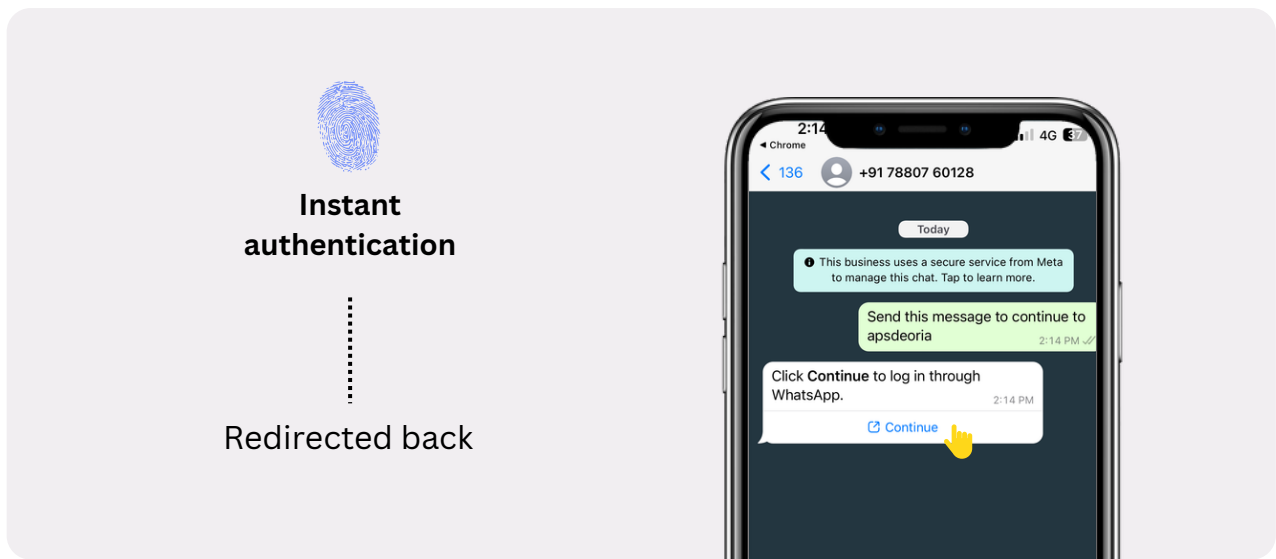

Improve user experience

Seamless phone verification process for a delightful experience

The diagram illustrates the redirection process. On the left, a blue circular arrow icon points to the text "Sign in with WhatsApp". Below this, a vertical dotted line leads to the text "Redirected to WhatsApp". On the right, a smartphone screen displays a login form with fields for "ID" and "Password", and a "Submit" button. At the bottom of the screen, a modal window titled "Sign in to apsdeoria with Lazyclick" contains a green button with the WhatsApp logo and the text "Continue with Whatsapp".

Integration Guide

Choose your platform

Website

Javascript

App

Android

Javascript

Install the Lazyclick SDK

Copy-paste this code on your login page

```
<script type="text/javascript"
src="https://www.lazyclick.in/lazyclick.js"></script>

<script type="text/javascript">
    lazyclick(wauser) {
        console.log(wauser);
    }
</script>
```

Android

Install the Lazyclick SDK

Step 1: Open settings.gradle/build.gradle(project)

```
repositories {  
    google()  
    mavenCentral()  
    maven { url 'https://jitpack.io' }  
  
    maven {  
        url = "https://maven.pkg.github.com/lazyclick/lazyclick"  
        credentials {  
            username = "lazyclick"  
            password = "ghp_o744LN5RMcAjOKf91OMawdHoi9Trbs2qRcD5"  
        }  
    }  
}
```

Step 2: Add dependency inside build.gradle(app)

```
implementation 'com.lazyclick:lazyclick-android-sdk:1.0.3'
```

Step 3: Inside onCreate() on your Activity/Fragment

```
override fun onCreate(savedInstanceState: Bundle?) {  
    super.onCreate(savedInstanceState)  
    setContentView(R.layout.activity_main)  
  
    // Do this on a button click where you want to login  
    Lazyclick.instance?.initFree(this) // Initialize  
  
    Lazyclick.instance?.setListener(object : DataListener { // Callback  
        override fun onMessageReceived(jsonString: String) {  
            Log.i("TAG", "onMessageReceived: $jsonString")  
        }  
  
        override fun onMessageSent(jsonString: String) {  
            Log.i("TAG", "onMessageSent: $jsonString")  
        }  
    })  
}
```
